<b>Description</b> <p>In ABCD only an institution can be the owner of a collection, person names are only available as e.g. somebody representing the collection owner. There is however inconsistency in the documentation of some concepts.</p> <p><a href="#">/DataSets/DataSet/Metadata/Owners/Owner/Person</a> -&gt; 'documentation': Person contact representing the owner of the data collection.</p> <p><a href="#">/DataSets/DataSet/Metadata/Owners/Owner/Person/FullName</a> -&gt; 'documentation': The name of person as normally used representing the data collection's legal owner. The name may include titles.</p>
