Description

Comment Jörg (after LIDO Workshop in February 2016):

LIDO has specific flags to indicate whether a field should be used for "Display Only" or "Index Only". This is an interesting idea which we want to consider using for ABCD 3.0 as well.

Allow ABCD to express data differently depending on whether it will be ingested by a machine or displayed to a human, as they have different needs. An example would be a persons name being displayed as ", " but indexed as " ".

Not to be confused with reference to external URIs, as described in ticket [#290](#).

History

#1 - 01/23/2017 01:52 PM - D. Fichtmüller

- Project changed from ABCD 3.0 Project to ABCD
- Subject changed from index vs. display (Jörg) to add a flag or other elemnt to indicate index vs. display texts
- Description updated
- Category set to Missing Concept(s)
