content: Label text in a specific language representing the organisation of the legal owner of the unit record.			
editorial notes: So far, for these pages I have been using the term "unit". Should it be "unit record" or something else? Here, we should speak of Unit record; the same is true for the IPR Statements (next item in the schema diagram). I thought I got these things more or less right in the explanations on the unit-level, but found some exeptions (will change in the schema, too): The following should be "unit record" instead of Unit: Unit Content Contacts, .. subtypes of the unit (2 cases), Associations, Assemblages. The following should be "unit" instead of Sampling Unit (a term not to be used): Gathering. The following are correctly termed Unit: Source Reference, Unit References, Identifications, Kind Of Unit, Multi Media Object, Named Collection Or Surveys, Measurements Or Facts, Sex, Age, Sequences.
