<b>Target version:</b>			
<b>Description</b>			
xpath: <a href="#">/DataSets/DataSet/Units/Unit/SpecimenUnit/NomenclaturalTypeDesignations/NomenclaturalTypeDesignation/TypifiedName/NameAttributed/Botanical/HybridFlag</a>			
content: A flag indicating that the nomenclatural type designation for the specimen is a named hybrid or a graft chimaera. The attribute Rank defines if this applies to the generic, species, or infraspecific level.			
editorial notes: I know the phrasing here probably does not convey the appropriate meaning - can you revise when you have a chance ?			

#### History

##### #1 - 01/25/2017 11:17 AM - D. Fichtmüller

- Project changed from ABCD 3.0 Project to ABCD
- Subject changed from Editorial notes: Hybrid Flag to Editorial notes: abcd2:SpecimenUnit-TypifiedName-HybridFlag
- Description updated
- Status changed from New to Closed

Fixed, corrected description to be aligned with [abcd2:TaxonIdentified-HybridFlag](#). At that occasion also added/fixed/extended the definitions for all other HybridFlag and HybridFlag-@insertpoint elements.
