<b>Description</b> xpath: /DataSets/DataSet/Units/Unit/SpecimenUnit/NomenclaturalTypeDesignations/NomenclaturalTypeDesignation/TypifiedName/NameAtomised/Bacterial/GenusOrMonomial  content: A generic name as a bacterial scientific name or as part of it that is a nomenclatural type designation for the specimen. Rules: 1. First letter capitalised 2. No spaces included.  editorial notes: Generic names are essentially the same under the different codes; however, to avoid having to place the essential parts of a name on different levels of the hierarchy, all name elements recognized under a specific code are listed in the respective section.			

History
