Description xpath: /DataSets/DataSet/Units/Unit/SpecimenUnit/NomenclaturalTypeDesignations/NomenclaturalTypeDesignation/TypifiedName/NameAtomised/Bacterial/GenusOrMonomial content: A generic name as a bacterial scientific name or as part of it that is a nomenclatural type designation for the specimen. Rules: 1. First letter capitalised 2. No spaces included. editorial notes: Generic names are essentially the same under the different codes; however, to avoid having to place the essential parts of a name on different levels of the hierarchy, all name elements recognized under a specific code are listed in the respective section.	

History

#1 - 01/25/2017 11:32 AM - D. Fichtmüller

- Project changed from ABCD 3.0 Project to ABCD

- Status changed from New to Closed

Is a valid editorial note that needs to be shown to the user. No action item for us.
