#### History

##### #1 - 01/25/2017 04:20 PM - D. Fichtmüller

- Project changed from ABCD 3.0 Project to ABCD
- Subject changed from Editorial notes: ID-in-Database to review definitions of abcd2:Sequence and subelements
- Description updated
- Category set to Documentation
- Assignee set to G. Dröge

In particular the definition of <http://terms.tdwg.org/wiki/abcd2:SequencedPart> seems a bit odd to me: "A description of the actually sequenced material derived from the unit (DNA/RNA/Protein, Gene or part of gene, completeness, etc.)".

From my understanding I would this element expect to be about which part of the organism the sequence was extracted from, e.g. "Leaf" or "Tissue Sample". But maybe I am misunderstanding something here.
