#### Description

(Clean-Up not backward compatible Status: Suggested)

There are two elements Date (`//Unit/Identifications/Identification/Date` and `//Unit/SpecimenUnit/History/PreviousUnits/PreviousUnit/Date`) and one element DateTime (`//Unit/Gathering/DateTime`) which all have the type `DateTimelSO`. This common type should be reflected in a common name. Alternatively all of them could be renamed to reflect that this is a complex type (has subelements) whereas all the other date related elements are a simple type.

Effected Elements:

[/DataSets/DataSet/Units/Unit/Identifications/Identification/Date](#)

[/DataSets/DataSet/Units/Unit/SpecimenUnit/History/PreviousUnits/PreviousUnit/Date](#)
